HOW DOES IT WORK?

INDEX SPACE STUDIO has 6 easy steps:

1. ANALYSIS

The INDEX® sales team works with the customer to analyse their needs (e.g., available space, products to be incorporated, type of packaging, etc.)

2. DESIGN

With the information obtained, the specialised installation team organises and optimises the product selection.

3. PRESENTATION

The proposed installation solution is presented with a 3D simulation of the shelving and the planogram, showing the arrangement of the product selection.

4. PREPARATION AND SHIPPING

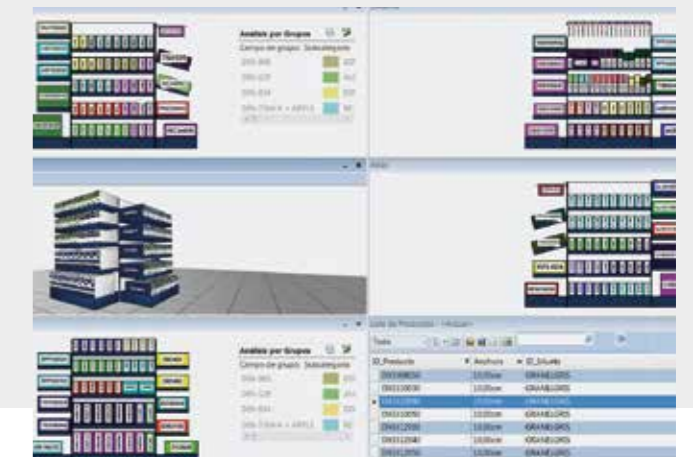

To facilitate display assembly, new installation shipments are prepared separately from other usual orders.

5. ASSEMBLY

The INDEX® specialised assembly team carries out the entire initial assembly. Installation of the furniture, location of the product, and installation of merchandising elements.

6. MAINTENANCE AND MONITORING

We ensure regular inspections of each shelf installation, proposing possible improvements, maintaining it in optimal and updated conditions, and facilitating restocking.
