

## MO-TL

## PRODUCT DESCRIPTION

- Long chemical anchor sleeve for solar panel installations. The 330 mm version is cuttable.

## CHARACTERISTICS

- Sleeve of Ø16x200 mm or Ø16x330 mm
- Material: Polypropylene
- For outside use
- Adjustment up to 190 mm by cutting marks every 10 mm in the 330 mm version
- Colour: White

## APPLICATIONS

PSE-A

The plastic sleeve secures an optimum distribution and a uniform curing of the chemical anchor. It is used for solar panel installation, in coplanar assembly system with direct fixing on the roof.

The structural components with which it is usually installed are:

- **PSE-A**, aluminium profile for assembled fixing
- **PSE-C**, aluminium profile for lateral assembled fixing
- **GP-XS**, perforated Steel channel Atlantis C4-M INDEXTRUT solar

PSE-C

GP-XS

The sleeve includes a centering plug that simplifies resin insertion into the sleeve and thanks to the division of the upper part of the 330 mm version, it allows a range of lengths usable with a single product, providing flexibility and cost-effectiveness.

Also, thanks to its high adhesion, it serves as a fixing during the pre-installation, maintaining the position of the elements to be fixed during the installation of the final fastening.

Indicated for use with threaded rod.

## BASE MATERIAL / FIXING SYSTEM

## BASE MATERIAL

Concrete

Hollow concrete

Hollow brick

## FIXING SYSTEM

KFS-RV / KFS-MA  
Threaded rod kit

Chemical anchor

## 1. RANGE

ITEM	CODE	PHOTO	DESCRIPTION	WIDTH	LENGTH	MATERIALS
1	MOTL16200		Long sleeve	16 mm	200 mm	 POLIPROPILENO POLYPROPYLENE
2	MOTL16330		Cutable long sleeve	16 mm	330 mm	 POLIPROPILENO POLYPROPYLENE

## APPLICATION EXAMPLES

Application example 1: mounting of the PSE-C aluminium profile on mixed roof tiles

Application example 2: mounting of the GP-XS steel guide on curved roof tiles

## 2.INSTALLATION INFORMATION
