

SL-PT

SL-PC

SL-PE

## CHARACTERISTICS

- Functioning by friction; install by controlled torque.
- Use for heavy duty loads in tension and shear.
- Easy assembly.
- Use for static or quasi-static loads.
- Hexagonal and countersunk heads.
- Installation through the material to be fixed.
- Assessment for structural uses in cracked and non-cracked concrete.
- It can be disassembled so that the surface is smooth (the expansion tool and cone remain inside the drill).
- Variety of lengths and metrics, flexibly of installation.
- Vds available for sizes from M8 to M20.
- Available in INDEXcal.

## APPLICATIONS

- Structural interior fixing in concrete.
- Fixing pillars and beams.
- Fixing beams, rails, machinery, shelves, scaffolding and corbels.
- Application where fire effects must be taken into account.

## BASE MATERIAL

**3. INSTALLATION PROCEDURE**

**3.1. INSTALLATION IN CONCRETE**

**1. DRILL**

Check the concrete base is well compacted and porosity insignificant.  
Dry, wet and flood drill allowed.  
Drill at hammer or percussion position.  
Respect specified diameter and depth.

**2. BLOW AND CLEAN**

Clean hole from dust and drill debris.  
Use air pump and brush.

**3. INSTALLATION**

Introduce the anchor until the head is in the same level of the fixture material surface.  
Use hammer if necessary.  
The anchor must be introduced through the material to be fixed.

**4. APPLY NOMINAL TORQUE**

Apply the nominal torque specified by using a dynamometric wrench.

4. RESISTANCE

Characteristic resistance in C20/25 concrete for an isolated anchor, without spacing and edge distance effects.

4.1 CHARACTERISTIC RESISTANCE [kN]

1 kN ≈ 100 kg

Underlined and cursive values mean Steel failure, **bolded** values mean failure in concrete, and others mean failure in pullout.

SAFETY COEFFICIENTS IN PULLOUT FOR TENSION LOAD IN HIGH RESISTANCE CONCRETE				
CONCRETE FACTOR		C30/37	C40/50	C50/60
$\Psi_c$ (Cracked and non-cracked)	M6	1,22	1,41	1,58
	M8	1,22	1,41	1,58
	M10	1,22	1,41	1,58
	M12	1,22	1,41	1,58
	M16	1,08	1,15	1,20
	M20	1,08	1,15	1,20

## 5. OFFICIAL DOCUMENTATION

You can obtain the following documents by means of our commercial department or our web page [www.indexfix.com](http://www.indexfix.com) :

- European assessment ETA 18/1108 for installation in cracked and non-cracked concrete according to EAD 330232-02-0601, option 1, de M6 a M20.
- Declaration of performance DoP SL.
- Certificate VdS CEA 4001:2021-01(07) *Guidelines for sprinklers systems. Planning and installation for applications of water extinguishing systems on concrete elements* from M8 to M20.
- Available for anchor calculation program INDEXcal.
